Structure & Fabrication
Since 1993

About us

A dedicated and reliable service provider in the realm of construction and engineering services. Established in 1992, our firm specializes in Building Structure Fabrication, Elevation Services, Beam Structure Fabrication Services, Roofing Design Services, and more. Operating as a Sole Proprietorship, we are based in Surat, Gujarat, and have built a strong reputation for delivering well-managed, timely services across India. Under the expert guidance of our mentor, "Mr. Babubhai Harsora", we have achieved significant success and recognition in the industry. Our commitment to quality and client satisfaction sets us apart, making us a trusted partner for all your engineering and fabrication needs.

Our process

Consultation

We begin by understanding your specific needs and project requirements through detailed consultations.

Fabrication

Utilizing state of the art technolog and materials, we execute the fabrication process with precision.

Quality Check

We conduct thorough quality checks at every stage to ensure the highest standards of work.

Planning and Design

Our team of experts develops a comprehensive plan and design tailored to your project.

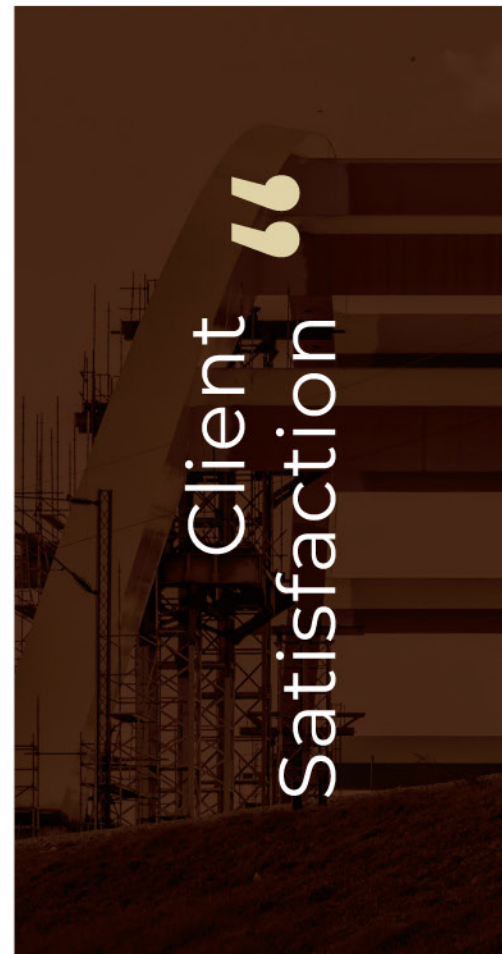

Implementation

Our skilled workforce ensures timely and efficient implementation of the project.

Completion and Handover

Upon successful completion, we hand over the project, ensuring client satisfaction and providing ongoing support if needed.

Prime motto of our firm is to attain the complete satisfaction of the customers by providing them with the best class services at most reasonable rates. These services are rendered in accordance with industry set norms with the assistance of our experienced and dedicated team members. Our team members only use the most modern machines and equipments while imparting these services. Apart from this, we provide these services in customized solution.

TRISHUL
Structure & Fabrication
Since 1993

01

Industrial building structure fabrication service

Our building structure fabrication service encompasses the fabrication of various structural components essential for construction projects. We specialize in crafting

durable and resilient structures tailored to meet your specific requirements. We provide fabrication services for industrial building structures, ensuring they are robust and built to withstand heavy duty usage, heavy loads, and harsh environmental conditions.

Our team uses advanced fabrication techniques and high grade materials to guarantee the longevity and reliability of industrial structures.

02

Iron building structure fabrication service

For projects requiring iron-based structures, we offer fabrication services using high quality iron materials. These services are ideal for constructing strong, durable frameworks that provide exceptional support and stability for various types of buildings.

Roofing building structure fabrication service

Our expertise extends to roofing building structures, where we design and fabricate sturdy frameworks that support roofing materials and provide structural integrity. Whether for commercial or residential buildings, our roofing structures are engineered for maximum performance and durability.

Structure & Fabrication
Since 1993

Elevation service

Our Elevation Service focuses on enhancing the visual appeal and architectural aesthetics of buildings through innovative elevation designs. We offer a range of elevation solutions to suit different architectural styles and preferences, helping your property stand out.

Our general elevation service caters to a wide range of building types, providing customized elevation designs that enhance curb appeal and create a lasting impression. We work closely with clients to achieve the desired architectural style and visual impact.

01

02

Iron structure elevation service

Iron elevations add a touch of elegance and sophistication to building exteriors. Our iron structure elevation service creates striking visual elements that elevate the overall aesthetics of your property, combining durability with artistic design.

03

Industrial structure elevation service

Industrial buildings often require distinctive elevations that reflect their functional purpose and branding. Our industrial structure elevation service delivers custom-designed elevations that complement industrial aesthetics, enhancing the building's exterior while maintaining functionality.

Iron beam structure fabrication service

Our Beam Structure Fabrication Service focuses on the fabrication of beams, crucial components in building construction. We leverage advanced techniques and quality materials to produce beams that meet stringent industry standards, ensuring optimal performance and safety.

01

Iron beams are commonly used in construction for their strength and cost-effectiveness. Our fabrication service delivers high-quality iron beam structures tailored to your project needs, ensuring they meet all structural and safety requirements.

02

Steel beam structure fabrication service

Steel beams offer exceptional strength and versatility, making them ideal for various construction applications. Our fabrication service ensures precise and durable steel beam structures, suitable for both commercial and industrial projects.

03

Warehouse beam structure fabrication service

We specialize in fabricating beams for warehouse structures, providing the necessary support and stability for large storage spaces. Our beams are designed to accommodate heavy loads and withstand the operational demands of warehouse environments.

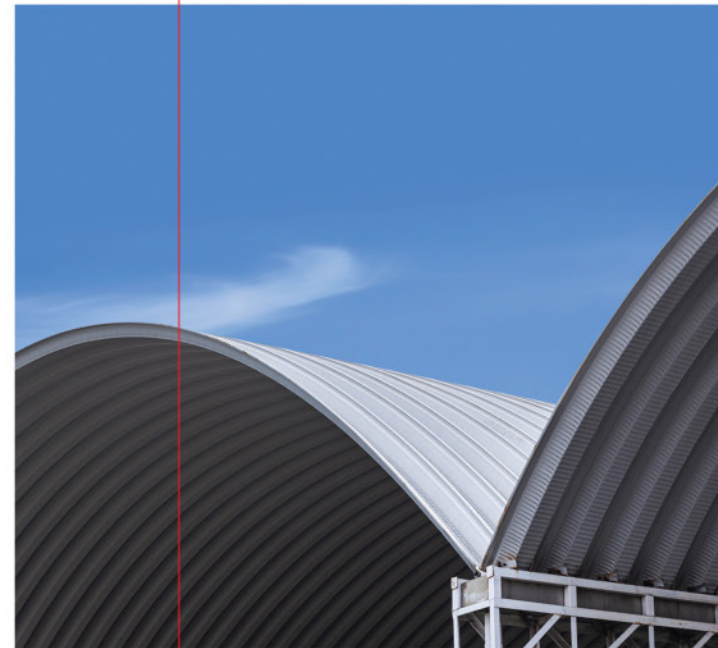

01

Roofing design service

Our Roofing Design Service focuses on creating innovative and functional roofing solutions for residential, commercial, and industrial buildings. We blend aesthetic appeal with practicality to deliver roofs that meet both structural and design requirements, ensuring durability and energy efficiency.

Our roofing design service encompasses the entire process, from conceptualization to execution, ensuring your roofing project meets your vision and functional needs. We provide customized roofing designs that enhance the overall aesthetics and functionality of your building.

02

Fiberglass roofing service

Fiberglass roofing offers excellent durability and weather resistance, making it a popular choice for various roofing applications. Our fiberglass roofing service ensures quality installation and long-lasting performance, providing a lightweight yet sturdy roofing solution.

03

Industrial roofing service

Industrial buildings require durable roofing solutions that offer protection and longevity. Our industrial roofing service delivers high-performance roofing systems tailored to industrial applications, using materials that resist wear, tear, and environmental damage.

Bridge structure fabrication service

Our Bridge Structure Fabrication Service specializes in the fabrication of bridge structures, including beams, girders, and support elements. We adhere to strict quality standards to ensure the structural integrity and safety of bridge infrastructure, meeting the demands of modern transportation networks.

Our comprehensive bridge structure fabrication service covers all aspects of bridge construction, from design to fabrication and installation. We ensure seamless project execution, delivering structures that are safe, durable, and reliable.

01

02

Steel bridge structure fabrication service

Steel bridges offer superior strength and durability, making them ideal for various transportation and infrastructure projects. Our steel bridge structure fabrication service delivers robust and reliable steel bridge components, engineered to withstand significant loads and environmental stresses.

03

MS bridge structure fabrication service

Mild steel (MS) bridges are widely used for their affordability and versatility. Our MS bridge structure fabrication service provides high-quality MS bridge components tailored to project specifications, ensuring cost effective and efficient construction solutions.

Other products

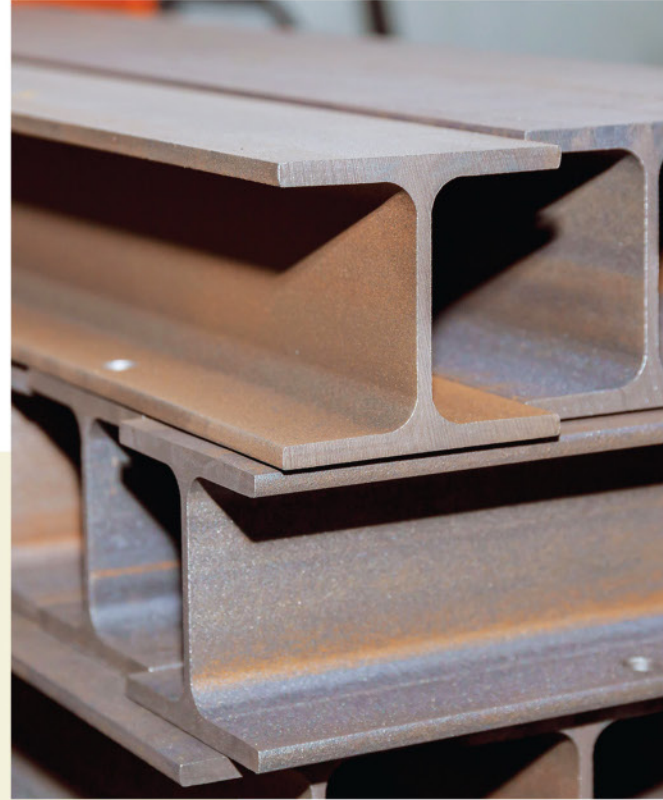

In addition to our core services, we also offer the following products.

01

Beam fabrication service

Fabrication of beams for various construction applications, ensuring precise dimensions and structural integrity. Our beams are suitable for use in residential, commercial, and industrial projects, providing essential support and stability.

02

MS Tower structure fabrication service

Fabrication of MS towers for tele communications, power transmission, and other infrastructure projects. Our MS towers are designed to meet industry standards and provide reliable performance.

03

Iron tower structure fabrication service

Fabrication of iron towers for communication, observation, and other specialized applications. These towers are built to withstand harsh conditions and provide long-term durability.

04

Dome structure fabrication service

Fabrication of dome structures for architectural and decorative purposes, adding unique design elements to buildings and landscapes. Our dome structures are crafted with precision to ensure aesthetic appeal and structural soundness.

Our Achievements

We take pride in leading roof engineering with innovative, durable solutions that redefine industry standards. Backed by a proven track record, our commitment to excellence has earned us industry recognition and long-lasting client partnerships.

Timeline of Success

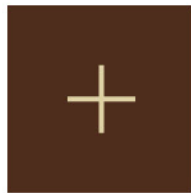

- 1992-1993 :** Our first project, a 7-ton roof for **Jivan Deep Society in Surat**, marked the start of our roof engineering journey.
- 1993 :** We completed the **Gajera School Roof** project, delivering a durable solution that reflects our expertise and commitment to quality.
- 1994 :** We started with **Laxmi Diamond**, offering expert fabrication and structural work, fostering long-term partnerships.
- 1995 :** We completed the **Mani Export Diamond Company** project, delivering a durable, innovative roofing solution.
- 1997 :** We provided a durable, innovative roofing solution for **Bhavani Gems Diamond Company**, demonstrating our expertise and quality.
- 2002 :** We provided an innovative, high-quality roofing solution for the **Millennium Market Textile** project, reflecting our expertise.
- 2005 :** We provided a durable and reliable roofing solution for **Panch Ratna Unity House**, Sani Road, Mumbai.

"We have also completed countless other projects."
